***Allowable Subject Matter***

1. Claims 1 and 2-10 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1 and 8 are the independent claims.

Claim 1 has been rewritten into independent form, including the subject matter for the welt (19) from original claim 2, including the subject matter for the ridges (15) from original claim 4 and including the limitation that both the tightening sleeve (13) and the ring (11) are metallic in composition. As a result, the Prior Art of record fails to disclose or imply the claim limitations of "the ring being formed with a radially outwardly open groove covered by the sleeve and being formed in the groove with transverse ridges" and "the sleeve being plastically deformed into the ridges in the groove". However, the Prior Art does disclose in Schnizler, Jr. et al. '454 that the bottom surface of the radially outwardly groove in the ring can be roughened to form tips on the roughened surface to aid in form-locking the pieces together (col. 2, lines 57-65). Although the Prior Art does disclose in Schnizler, Jr. et al. '454 the above, it does not teach that the tips of the roughened surface can be in the form of transverse ridges.

The allowable subject matter of claim 8 has been rewritten into independent form, including all of the limitations of the base claim and the intervening claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
